TIER 3 PUBLIC NOTICE

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for Thim Water Company 2

Our water system violated drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During July – September 2021we did not complete all monitoring or testing for Stage 2 Disinfection Byproducts and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?
There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year; how often we are supposed to sample and how many samples we are supposed to take; how many samples we took; when samples should have been taken; and the date on which follow-up samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	When samples were taken
Total Trihalomethanes (TTHM)	2 samples every year	1	August 2021	August 2022
Haloacetic Acids (HAA5)	2 samples every year	1	August 2021	August 2022

What is being done?
The subsequent samples have been pulled in accordance with ADEQ rules as of August 2022.

For more information, please contact Jason Long at 520-431-7723 or PO Box 85160, Tucson, AZ 85754.

Please share this information with other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
