

TIER 3 PUBLIC NOTICE

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for Valle Verde – West Water Company

Our water system violated drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During February 2024 we did not submit result for Total Coliform and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year; how often we are supposed to sample and how many samples we are supposed to take; how many samples we took; when samples should have been taken; and the date on which follow-up samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	When samples were taken
Total Coliform	1 sample monthly	0	February 2024	March 2024
MDRL Report – Chlorine Residual	Monthly	0	February 2024	March 2024

What is being done?

All corresponding sampling was pulled in the following month to regain compliance and once again be able to confirm the quality of water. Moving forward the system will pull all required samples in the corresponding sampling time frame allowed.
