

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

PRECAUTIONARY BOIL NOTICE

Joshua Valley Utility Company is issuing a precautionary boil notice. Until the utility has informed you the water is safe to drink, we advise you to use bottled water OR boil all tap water before consumption/use.

Due to the damage caused by the storm on 9.6.25 Joshua Valley Utility Company has issued a precautionary boil notice. **As a precaution, we advise you to either utilize bottled water or boil your tap water for a minimum of 3 minutes before using it for drinking or preparing food that is not otherwise cooked.**

Inadequately treated water may contain disease-causing organisms. These organisms include bacteria, viruses, and parasites which can cause symptoms such as nausea, cramps, diarrhea, and associated headaches. These symptoms, however, are not caused only by organisms in drinking water, but also by other factors. If you experience any of these symptoms and they persist, you may want to seek medical advice.

What is being done:

We are continuing to make repairs to the system, which includes adding chlorine to disinfect the water. We are working with our Certified Drinking Water Operator to make the repairs as quickly as possible.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
